

# UPDATED TAX TABLES FOR LOUISIANA

**T**he Louisiana Department of Revenue implemented new tax withholding tables on February 16th to comply with the federal tax reform. Although federal income taxes decreased because of the new tax law, Louisiana state income taxes will increase due to a clause in the state constitution linked to federal income tax policy that allows one tax to increase while the other tax decreases. The updates that went into effect on February 16th will ensure employers are withholding the correct amount of state taxes from employee paychecks. To avoid penalties, employers should start using the new tax rates immediately if not already.
