Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

FOREWARD

The Tax Cut and Jobs Act (TCJA) signed into law in late 2017 made some of the most significant tax regulation changes in decades and created many new planning opportunities for contractors. Changing entity types, accounting methods, new deductions for qualified businesses, new depreciation alternatives and new tax incentives for qualified investments are just some of the provisions in the TCJA that will require careful analysis and proactive planning for CPAs and their contractor clients.

The CICPAC Tax Thought Leadership Committee has compiled a summary of those changes potentially impacting our construction clients for consideration. In the interest of timing, this document only provides an overview for further consideration for planning in 2018 and beyond. Our intent is to follow this summary with more in-depth guidance and practical application materials as we work through implementation of the new regulations and additional information becomes available.

Many thanks to the members of the Tax Thought Leadership Committee for their contribution to the CICPAC organization and their collective efforts resulting in this initial document:

- Jackie Daenen, Daenen Henderson & Co., Chair – Accounting Method \$10-25M
- Matt Neely, MCM, Chair – Accounting Method Over \$25M/PCM
- Kevin Golden, James Moore, Chair – Section 199A
- Kyle Kmiec, CalvettiFerguson, Chair – Miscellaneous Tax Reform Items
- Kristin Bailey, KatzAbosch
- Ben Lyon, Katz, Sapper & Miller
- Eric Fletcher, Thompson Greenspon
- Dan Shepherd, LUTZ
- Scott Bechtel, GBQ Partners
- Joseph Molloy, Grassi & Co.
- Sara Andzeiczak, Iannuzzi Manetta
- Cody Daniels, Mowery & Schoenfeld
- Tracie Dupuy, HORNE LLP
- Tricia Neale, Thompson Greenspon
- Chase Lister, Daenen Henderson & Co.

We are also very grateful to Warren Hennigan, Marcum LLP, who served as technical editor of the document and, of course, to Kathleen Baldwin and Michelle Class for bringing it all together.

CONSTRUCTION ACCOUNTING METHODS

One of the most comprehensive changes included in the TCJA is the changes in tax accounting methods available for contractors. Methods previously only available to smaller contractors are now available for contractors with average annual gross receipts of receipts of up to \$25 million. In addition, IRS revenue procedures issued in 2018 provide that most of the allowable changes will be considered automatic.

Although automatic changes will still require a submission of Form 3115 to the IRS, the amount of detail and documentation is significantly reduced, user fees of up to \$9,500 are not applicable and prior approval of the IRS before adoption is not required so the form can be submitted with the tax return for the year. This provides additional time to analyze the impact of a potential change as well having available the actual year end numbers that will be affected while performing the analysis.

Since accounting methods only impact the timing of when income or deductions are reported it is considered revenue neutral. The timing changes however can result in deferral of tax liabilities. Some amount of deferral or increasing deferrals can result in permanent or at least long-term tax savings to companies: theoretically a win-win for the government and the taxpayers.

LARGE CONTRACTORS

As noted above, under pre-TCJA regulations large contractors were considered to be those with average annual gross receipts of \$10 million and above. That limit is now raised to \$25 million and above. Contractors meeting those revenue limits are still required to use the percentage of completion method (with some variations) to account for all long-term contract revenues. However, the IRS issued revenue procedures issued in 2018 that now include the ASC 606 Revenue Recognition Standards as an acceptable percentage of completion method. Contractors will need to analyze the impact of the standards on the timing of their revenues. If the implementation of the new standards for financial statement purposes generally results in reporting revenues later rather than sooner, a switch to this method for taxes also will result in deferred \ reduced tax liabilities. An ancillary benefit would also be to minimize book \ tax reconciliation differences.

Revisions to IRC Section 451(b) regarding timing of income recognition and new 451(c) related to advance payments should also be considered.

The charts on the following pages provide an overview of these new provisions as well the other accounting methods that have not been changed and are allowable for large contractors.

Accounting Method Changes for Large Contractors

Description of Change	What Contractors may Benefit	Action Steps	Timing	Other Considerations
Adoption of New Revenue Recognition Standards (ASC 606)	Application of revenue recognition standards for GAAP, may slow or accelerate revenue for reporting purposes, depending on when taxpayer recognizes revenue under new performance obligation model set forth in new standards.	Goes into effect for calendar year 2019, but important to identify during 2018 process, potential impact areas for GAAP reporting and its impact for tax.	Any automatic change can be made in the taxpayer's first, second or third taxable year ending on or before May 10, 2021.	Outside of the current three year window noted under 'timing', advance consent with the IRS would be required pending further guidance.
Impact of Section 451(b) on Book-Tax Conformity	New rule under TCJA, mandates certain accrual method taxpayers shall recognize gross income for tax purposes no later than taken into account in a taxpayer's applicable financial statement.	This binds closely with new ASC 606 standards above, as its important to understand potential GAAP differences and/or upcoming changes to GAAP revenue reporting. Even if do not elect to follow ASC 606 for tax purposes, 451(b) may require following similar concepts for consistency with financial statement reporting.	No need to file a Form 3115 if any required change (under new tax) is made immediately in the first taxable year after December 31, 2017.	Applies only if accrual method and have a required applicable financial statement (AFS). For closely held contractor clients this would normally mean an <u>audited</u> financial statement. The new rules do not apply to any specific items of gross income where a special method of accounting is used (i.e. - Sec. 460).

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Impact of Section 451(c) on Advance Payments	New rule under TCJA, mandates accrual method taxpayer must include advance payments in income when received, unless elected to defer for tax purposes to the first year only following receipt.	Identify if taxpayer receives advance payments, and determine if any current inconsistencies between GAAP and tax reporting, and if the deferral on those payments exceeds 12 months.	No need to file a Form 3115 if any required change (under new tax law) is made immediately in the first taxable year after December 31, 2017.	This section largely tracks existing Revenue Procedure 2004-34, which allowed the deferral of advance payments in a similar manner pre tax reform.
---	---	---	---	--

Accounting methods available to large contractors, over \$25 million in average annual gross receipts, has not changed:

Percentage of Completion (PCM)	In general, taxable income from a long-term contract is determined under PCM.	If contractor moves from a defined small contractor to a large contractor due to revenue growth no formal election or method change needed. Apply PCM to the contracts started in the first year of application.	Incorporate into a entity tax return, including extensions.	Large contractors will typically be required to apply PCM to long-term contract. As noted under action steps if contractor moves between large and small under the definition of the \$25M, further considerations should be given.
Percentage of Completion (PCM) - 10% Method	Defer recognition of revenue under PCM until 10% of estimated total contract costs are incurred and allocated.	Election attached to tax return in the year adopting.	File with entity tax return, including extensions.	Unavailable if the taxpayer elected to utilize the simplified cost-to-cost method for PCM, versus standard "cost-to-cost" method.

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Percentage of Completion - Capitalized Cost Method (PCCM)	Ability for those contractors with residential construction contractors to report 70% of the contract under PCM, and the remaining 30% under exempt method (e.g. - completed contract).	Requires advance consent of the IRS by filing Form 3115.	Filed by the last day of applicable tax year.	Definition of residential contract in this regard means building with 4 or more units versus home construction contract which is 4 or fewer. Further definitions are key to review under IRC Section 460(e).
Accrual Excluding Retainages	Defer inclusion in income of retainages withheld by customer until final acceptance by customer occurred as specified in the contract. Contract must be exempt from IRC Section 460 (short-term).	Requires automatic consent of the IRS by filing Form 3115.	File with entity tax return, including extensions.	Must also exclude retainage payable related to same short-term contracts.
Accrual Excluding Retainage Payable	Retainage payable related to long-term contracts are not included in contracts costs until the retainage is payable to the subcontractor as defined in the contract. This slows the percent complete and reduces income recognition.	Requires advance consent of the IRS by filing Form 3115.	Filed by the last day of applicable tax year	Contract language is key is applicability.

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

SMALL CONTRACTORS

The small contractor exception requiring the use of the percentage completion method has been expanded from contractors with average annual gross receipts of less than \$10 million to \$25 million. Contractors not exceeding the \$25 million limitation and previously using the percentage completion method to account for revenues from long term contracts now have broad range of choices for tax accounting methods.

In addition, IRC Section 448 has also been expanded to allow the cash method of accounting for companies with receipts of less than \$25 million. Revisions to IRC Section 471 eases accounting for inventories also allowing the cash basis for smaller companies.

Previously, changes in accounting for long term contracts would require advance notification and approval by the IRS. Changes for contractors no longer meeting the requirements for percentage completion or accrual basis of accounting requirements are now considered automatic. Form 3115 is still required but is submitted with the tax return for the year of change, no user fees apply, and the information required is significantly reduces. Changes from the percent complete method are made on the cut-off method so revenues from contracts in progress prior to the year of change will still be accounted for under the old method. Changes in overall methods, i.e. from accrual to cash, are made through a 481(a) adjustment. I.e. the effect of the change is determined at the beginning of the year of change and taken into income over four years if a positive adjustment and deducted in the year of change if negative.

The chart on the following pages provides an overview of these new provisions.

Accounting Method Changes for Smaller Contractors

Description of Change	What contractors may benefit	Action Steps	Timing	Other Considerations
Accounting for Long Term Contracts				
TCJA increased the exemption for requirements to use the percentage completion method of accounting for long term contracts for taxpayers with less than \$10 million in average annual gross receipts to less than \$25 million in average annual gross receipts	Contractors with revenues less than \$25 million currently using the % completion method	Completion and submission of Form 3115 under automatic change provisions	By due date of the return including extensions	Conversion applied on the cut-off method for contracts entered into after December 31, 2017
Other methods available:				Application may be made concurrent with other changes available under TCJA provisions
Completed contract - Revenues and costs for each contract is deferred until the job is at least 95% complete				For non C corporation entities - beware of AMT issues on taxable income difference between method and percent complete income
Cash - Revenues are and costs are recognized when collect \ paid.				
Accrual - Revenues recorded as available to be billed, Costs recorded based on economic performance occurs				

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Overall Method Change from Accrual to Cash Method TCJA increased the gross receipts threshold for the requirement to use the accrual method of accounting from \$5 million to \$25 million	Contractors with revenues less than \$25 million currently on the accrual method	Completion and submission of Form 3115 under automatic change provisions	By due date of the return including extensions	Conversion made through 481(a) adjustment determined at beginning of the year of change with negative adjustment applied in the year of change and positive adjustment taken into account ratably over 4 years
--	--	--	--	--

Accounting for Inventories

TCJA no longer requires accrual method of accounting if company revenues are less than \$25 million; inventory is non-incidental material and supplies or accounting treatment is consistent with applicable financial statement

WHAT IS SECTION 199A AND WHO BENEFITS?

Section 199A provides a 20% deduction on the amount of Qualified Business Income (referred to as QBI and defined later) from a domestic business operated as a partnership, S-Corporation, sole proprietorship, trust or estate. This deduction is in response to the approximate 20% tax rate cut for C-Corporations and replaces the Domestic Productions Activity Deduction (DPAD).

Section 199A applies to all US (including Puerto Rico) non C-corporation taxpayers and is calculated at the individual taxpayer level. It is limited by each individual taxpayer's taxable income range and the industry in which they conduct their trade or business. Specified Service Trade or Businesses (referred to as SSTB and defined later) can reduce or eliminate the amount of deduction received. There are several other limitations which are discussed later in detail.

Section 199A puts all taxpayers into one of three categories:

1. Those below the taxable income threshold (\$157,500 single/\$315,000 married filing joint)
2. Those above the taxable income threshold and within the phase-in range (\$157,500-207,500 single/\$315,000-415,000 married filing joint)
3. Those above the taxable income threshold and above the phase-in range

Depending on the category an individual taxpayer falls within certain limitations may apply.

HOW IS "QUALIFIED BUSINESS INCOME" DEFINED?

Per IRC Sec. 199A(c), qualified business income means the net amount of qualified items of income, gain, deduction, and loss with respect to any qualified trade or business of the taxpayer. QBI does not include any qualified REIT dividends or qualified publicly traded partnership income. Qualified items of income, gain, deduction, and loss mean items of income, gain, deduction and loss to the extent such items are effectively connected with the conduct of a trade or business within the United States, and included or allowed in determining taxable income for the taxable year (Sec. 199A(c)(3)(A)).

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Simply put, Box 1 or Box 2 from K-1s, Schedule C income, Schedule E rental income (pending further guidance from the IRS), and Schedule F farm income are all included in QBI. Also included are Sec. 751 gain or loss giving rise to ordinary income and Sec. 481 adjustments (if the adjustment arises in taxable years ending after 12/31/17). Previously disallowed losses under Secs. 465, 469, 704(d), and 1366(d) allowed in the taxable year are taken into account for purposes of computing QBI if the losses were disallowed after 12/31/17.

Items of income and deduction that are excluded from QBI include: short-term and long-term capital gains & losses, dividend income, interest income (other than interest income which is properly allocable to a trade or business), wages to shareholders, partner guaranteed payments, and Sec. 1231 gains (unless taxed at ordinary rates).

HOW IS A “SPECIFIED SERVICE TRADE OR BUSINESS” DEFINED?

A Specified Services Trade or Business (SSTB) includes any trade or business involving the performance of services in the fields of:

- Health, law, accounting, actuarial sciences, performing arts, consulting, athletics, financial services, brokerage services,
- Any trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees or owners, or
- Which involves the performance of services that consist of investing and investment management trading, or dealing in securities, partnership interests, or commodities.

Based on the definitions in the proposed regulations and pending further guidance from the IRS, certain professions that appear to be SSTBs are not. In general construction activities in the industry are not SSTBs.

WHEN DO THE LIMITATIONS APPLY?

The income category of the taxpayer will determine the limitations on the 199A deduction. The three categories of income thresholds are listed above, and the deduction can be limited by two major factors:

1. W-2 wages and qualified property
2. Whether the trade or business is an SSTB

W-2 Wages and Qualified Property Limitation

The deduction is limited to the lesser of 20% of the qualified business income OR the greater of 1) 50% of the W-2 wages relating to the qualified trade or business and 2) the sum of 25% of the W-2 wages and 2.5% of the unadjusted basis of qualified property.

If the taxpayer falls in the first category (under the income threshold of \$157,500 single/\$315,000 married filing joint), the wage and qualified property limitation do not apply. The limitation is phased in over the income above the threshold for the taxpayers who are in the second category (\$157,500-207,500 single/\$315,000-415,000 married filing joint). Taxpayers in the third category (above the thresholds) apply the wage and qualified property limitation in full.

Specified Service Trade or Business Exception

As stated above, a SSTB taxpayer may not be able to claim any or the full 199A deduction otherwise allowed based on the income category that applies to the taxpayer. The same categories apply to the SSTB exception in a similar way to the wage and qualified property limitation.

The SSTB exception does not apply to taxpayers in the first category. Therefore, even a SSTB taxpayer below the income threshold can claim the 199A deduction. The deduction amount of an SSTB taxpayer is phased out over the income range for SSTB taxpayers in the second category. For a SSTB taxpayer in the third category, the 199A deduction is prohibited on the corresponding SSTB income.

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Because most construction companies will not fall under the SSTB designation, the wages and qualified property limitation will be the most significant consideration in determining the 199A deduction.

HOW DO WE APPLY THE 199A?

The following examples illustrate the application of the 199A deduction in various scenarios.

Income Above Threshold Amounts – Wage-Intensive Business

	Business Other than Specified Service Business	Specified Service Business
Partner's Share of Qualified Business Income	\$ 1,000,000	\$ 1,000,000
Partner's Share of W-2 Wages	\$ 200,000	\$ 200,000
Partner's Share of Unadjusted Basis of Qualified Property	\$ 10,000	\$ 10,000
20% of Partner's Share of Qualified Business Income	\$ 200,000	\$ 200,000
Deduction (Apply 50% of W-2 wage limit)	\$ 100,000	\$ 0

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Income Above Threshold Amounts – Capital-Intensive Business

	Business Other than Specified Service Business	Specified Service Business
Partner's Share of Qualified Business Income	\$ 1,000,000	\$ 1,000,000
Partner's Share of W-2 Wages	\$ 50,000	\$ 50,000
Partner's Share of Unadjusted Basis of Qualified Property	\$ 1,000,000	\$ 1,000,000
20% of Partner's Share of Qualified Business Income	\$ 200,000	\$ 200,000
Deduction (Apply 25% of W-2/2.5% unadjusted basis limit)	\$ 37,500	\$ 0

WHERE DO WE GO FROM HERE?

Because the regulations related to 199A are only proposed, we continue to have questions regarding specific applications to each taxpayer. However, as we approach year end, we need to consider how each of the following will impact the 199A deduction of taxpayers.

WAGE LIMITATION

Wages play a major role in the calculation of the 199A deduction. Below are three scenarios

	A	B	C
Wages (including owners)	\$ 400,000	\$ 200,000	\$ 300,000
Taxable income	\$ 600,000	\$ 800,000	\$ 700,000
20% of QBI	\$ 120,000	\$ 160,000	\$ 140,000
50% of wages	\$ 200,000	\$ 100,000	\$ 150,000
199A Deduction	\$ 120,000	\$ 100,000	\$ 140,000

In Scenario A (most construction companies) – the deduction is limited to 20% of QBI. Therefore reducing owner’s wages and increasing QBI will increase the deduction. Consider paying quarterly estimates instead of a bonus to pay safe harbor amounts. If the owner reduces his wages by \$100,000, and takes a distribution instead, the deduction is increased by \$20,000. Please remember to watch reasonable compensation.

In Scenario B (possible for construction management and A&E firms) – the deduction is limited to 50% of the wages. Therefore increasing owner’s wages will increase the deduction. As with any planning technique, consider the cost of increasing payroll expenses versus the benefit of increasing the 199A deduction.

In Scenario C – this is close to the optimum wage to QBI percentage, 50% of wages approximates 20% of the QBI.

Another area relating to wages are leased employees, if you have a developer who maintains a separate partnership for all projects but uses one entity for payroll, the payroll can be allocated to the end users of the payroll, thus increase the 199A deductions.

Subcontracting is very common in the construction industry and subcontractor fees do not qualify as wages. If your company heavily relies on subcontracting you may want to consider who you can include on payroll to maximize your 199A deduction.

PROPERTY LIMITATIONS

Another limit of the deduction is 2.5% of unadjusted basis on qualifying property plus 25% of wages. Property no longer qualifies after 10 years from the original placed in service date or the last day of last full year in the applicable recovery period determined under section 168. If this factors into the 199A deduction, it should factor into property replacement decisions.

AGGREGATION RULES

A taxpayer can potentially choose to aggregate businesses for the deduction if the taxpayer operates multiple businesses in coordination with each other, shares resources, and are commonly controlled. How a taxpayer groups or doesn't group businesses for purposes of applying the passive activity loss rules doesn't affect how the taxpayer can aggregate or not aggregate businesses for purposes of applying the QBI deduction rules. After a taxpayer chooses to aggregate two or more businesses for QBI deduction purposes, he or she must continue to aggregate the businesses in all subsequent tax years.

OTHER CONSIDERATIONS

If the business income does not qualify for the 199A deduction consider additional wages to reduce the income to an amount under the threshold and look at other deductions such as bonus depreciation, Section 179 depreciation, and retirement or SEP contributions. Conversely some taxpayers may need to reduce the amount of deductions to optimize their 199A deduction.

Consider extending the 2018 tax return as the IRS is continually releasing clarifications and some technical corrections are expected.

In summary, Section 199A can provide a tax benefit but how to best derive that benefit can be vastly different taxpayer by taxpayer. It is highly recommended you consult the CICPAC group and your tax advisor to discuss any planning needs.

OTHER OPPORUNITIES \ CONSIDERATIONS UNDER TCJA

EXCESS BUSINESS LOSSES

The TCJA brought in some unfavorable rules around the deductibility of excess business losses. The maximum annual business loss is now \$500,000 for joint filers and \$250,000 for singles. These rules apply at the taxpayer level for pass-through business income (or schedule C business income) and do not apply to C corporations. There has been no guidance issued on whether related business can be aggregated to offset a loss greater than \$500,000. One interesting item to note is how the carry forward losses change from year 1 year to year 2. Excess losses are carried forward to future years as Net Operating Losses, so they are not subject to the \$500,000 maximum limitation, but are limited in the same way NOLs are limited. (See discussion below)

CHOOSING BETWEEN S CORP VERSUS C CORP

The TCJA brought about a myriad of changes to C Corp and S Corp tax rules. Over the past 40 years, tax practitioners have seen the effective corporate tax rates increase relative to personal income tax rates. The TCJA brought a significant reduction of the federal corporate tax rate and not quite the same reductions in personal tax rates. It is easy to see why a corporate tax structure is a much easier tax pill to swallow and may be the most tax efficient entity type if a large portion of earnings are not being distributed to owners but are being retained in the company for growth and/or debt repayment.

- Highest effective tax rates of S-Corp net income – 37% (29.6% with full section 199A deduction)
- Highest effective tax rates of C-Corp net income – 21% (plus 15% or 23.8% on dividend distributions)

Considerations to keep in mind for converting from an S-Corp to a C-Corp:

- Is Entity/Owners eligible for QBI Deduction?
- If change from S to C, how are historical earnings taxed leaving a C-Corp

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

- Per 1371(e)(1) during the post-termination transition period (PTTP) the corporation is allowed distributions tax free to the extent of AAA. These distributions decrease the owner's basis in the stock. Note – lack of clarity what happens to unused AAA if re-elect S status down the road.
 - After PTTP closes distributions are treated as pro-rata coming from AAA and E&P for an eligible S-Corp (same ownership proportions as S-Corp when C-Corp)
 - PTTP generally ends on later of one year after S-election revocation or due date for filing the final S-Corp return including extensions.
- Plan for Future Cash Distributions to Owners (beware, second layer of tax)
 - Future Plan to exit the business (beware, second layer of tax)
 - Must remain C-Corp for five tax years.
 - Must Consider B.I.G. consequences for 5 years post re-electing S-Corp status

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Below is a chart comparing the pre and post TCJA impact of an S- and C-Corporation:

	S-Corporation		C-Corporation	
	Pre Tax Law	Post Tax Law	Pre Tax Law	Post Tax Law
Qualified Business Income	\$ 1,500,000	\$ 1,500,000	\$ 1,500,000	\$ 1,500,000
DPAD	9.0%	(135,000)	(135,000)	
199A Deduction	20.0%		(300,000)	
Net Taxable Income	\$ 1,365,000	\$ 1,200,000	\$ 1,365,000	\$ 1,500,000
Tax Rates	39.6%	37.0%	34.0%	21.0%
Tax Expense	\$ 540,540	\$ 444,000	\$ 464,100	\$ 315,000
Tax on Distribution of Income / Dividend			\$ 207,180	\$ 237,000
Total Tax	\$ 540,540	\$ 444,000	\$ 671,280	\$ 552,000
Effective Tax Rate	36.0%	29.6%	44.8%	36.8%

TAX PLANNING TIPS AROUND NET OPERATING LOSSES, BONUS DEPRECIATION, AND SECTION 179

NOL CHANGES

The Tax Cuts and Jobs Act significantly changed the way NOLs generated in 2018 and beyond are treated. First, NOLs generated in 2017 or prior still continue to follow the old rules, carry back period of two years and/or carry forward for 20 years. NOLs generated in 2018 are only able to be carried forward indefinitely. Also, NOLs can only offset 80% of taxable income. This significantly decreases the value of the NOL tax assets.

BONUS DEPRECIATION CHANGES

The TCJA brought some major changes to the treatment of bonus depreciation. First, the bonus depreciation amount increased from 50% to 100% acquired after September 27, 2017 through 2022 and will phase down to zero over a 5 year period after that. Secondly, the TCJA removed the requirement that the original use of qualified property must commence with the taxpayer. In other words, new AND used assets are eligible for bonus depreciation.

SECTION 179 CHANGES

The TCJA did not make major changes to Section 179 depreciation. Section 179 is still allowed on both new and used property. The maximum deduction increased from \$500,000 to \$1,000,000. Plus, the phase-out threshold increased from \$2,000,000 to \$2,500,000. At \$2,500,000 of purchased Section 179 starts to phase out dollar for dollar and is fully phased out at \$3,500,000.

TAX PLANNING TIPS

Since Congress heavily expanded the use of bonus depreciation, we foresee many taxpayers having a very high tax depreciation expense in 2018 and beyond. In many circumstances, the use of bonus depreciation will likely cause a taxable loss, therefore generating a net operating loss. Since NOLs can no longer be carried-back and can only offset 80% of future taxable income. We recommend using Section 179 as a tool to limit the NOL generation and generate a section 179 expense carry forward. Section 179 expense carry forward will offset future taxable income dollar for dollar, while the NOL may only offset 80% of taxable income.

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Comparison of M&E Expense Under the Old Law Versus the New Law

Event	2017 Expenses (Old Rules)	2018 Expenses (New Rules)
Office Holiday Party or Summer Picnic	100% deductible	100% deductible
Client Business Meals	50% deductible if taxpayer is present, and not lavish or extravagant	50% deductible if business is conducted, taxpayer is present, and not lavish or extravagant
Entertainment-related Meals	50% deductible	No deduction (e.g., meals incurred when no business is conducted, potentially at night clubs, cocktail lounges, theaters, country clubs, golf and athletic clubs, sporting events, and on hunting, fishing, vacation and similar trips)
Transportation to/from Restaurant for Client Business Meal	100% deductible	100% deductible
Sporting Event Tickets	50% deductible for face value of ticket.	No deduction
	50% deductible for skybox expenses to the extent of non-luxury seat ticket face value in such box.	No deduction
	100% deductible for charitable sporting events.	No deduction
	Contributions for the right to purchase tickets to an educational institution's athletic events 80% deductible.	No deduction
	50% for transportation to/from and parking at sporting events.	No deduction

Tax Planning Opportunities

for the Construction Industry
HORNE LLP | Tracie Dupuy

Event	2017 Expenses (Old Rules)	2018 Expenses (New Rules)
Club Memberships	No deduction for club dues; however, 50% deduction for expenses incurred at a club organized for business, pleasure, recreation, or other social purposes if related to an active trade or business	No deduction
Meals Provided for the Convenience of Employer	100% deductible provided they are excludable from employee's gross income as de minimis fringe benefits; otherwise 50% deductible	50% deductible (nondeductible after 2025)
Meals Provided to Employees Occasionally and Overtime Employee Meals	100% deductible provided they are excludable from employees' gross income as de minimis fringe benefits; otherwise 50% deductible	50% deductible
Water, Coffee, and Snacks at the Office	100% deductible provided they are excludible from employees' gross income as de minimis fringe benefits; otherwise 50% deductible	50% deductible (nondeductible after 2025)
Meals in Office During Meetings of Employees, Stockholders, Agents, or Directors	50% deductible	50% deductible
Meals during Business Travel	50% deductible	50% deductible
Meals at a Seminar or Conference, or at a Business League Event	50% deductible	50% deductible
Meals included in Charitable Sports Package	100% deductible	50% deductible

OPPORTUNITY ZONES

The Opportunity Zone Program is an effort by the Federal Government to spur new or increased investments in low-income communities. It is based on 25% of the census tracts identified as 'Low Income Communities' by the Community Development Financial Institutions Fund (CDFI Fund), a division of the US Department of the Treasury.

The program offers a tax incentive for investors by allowing them to contribute their capital gains within 180 days of the sale into Opportunity Funds. Under the program, if a capital gain is invested in a Qualified Opportunity Fund within 180 days of realizing the gain, then the gain is not included in income until the investment is sold, or December 31, 2026, whichever is sooner. There are three potential separate tax benefits – (1) temporary deferral, (2) permanent exclusion of either 10% or 15%, or (3) permanent exclusion of post-acquisition appreciation.

The investor can contribute their capital gain in a Qualified Opportunity Fund within 180 days of the sale, then the tax due on the gain can be deferred for as long as eight years, decreasing the gain by up to 15% and escaping tax on future appreciation if held at least 10 years. There are roughly 8,700 opportunity zones throughout the United States.

Requirements:

- Must be certified by the US Treasury Department
- Must be organized as a corporation or partnership for the purpose of investing in Qualified Opportunity Zone Property.
- Must hold at least 90% of their assets in Qualified Opportunity Zone Property
- Qualified Opportunity Zone property includes newly issued stock, partnership interests, or business property in a Qualified Opportunity Zone business.
- Opportunity Fund investments are limited to equity investments in businesses, real estate, and business assets that are located in a Qualified Opportunity Zone.
- Loans are not eligible for the tax incentives.
- Opportunity Fund investments are subject to a substantial rehabilitation requirement.
